JOB OFFER 2022S108

5G MOBILE ACCESS ENGINEER

As a 5G Mobile Access Engineer, you will have the possibility of actively contributing to the next-generation 5G network we are developing for Defense applications.

Join this challenge and you will

- Support Sma-RTy in New Mobile Technologies deployment (5G SA, Mobile Private Networks)
- Analyze and Troubleshoot Mobile Access technologies
- Perform research activities on 5G evolution propositions
- Follow the evolution of the radio access network 3GPP and O-RAN specifications

Key qualifications

- Knowledge of 4G / 5G mobile network architectures (e.g.: eNodeB, gNodeB, MEC, Core Network, etc.)
- Knowledge of the main mobile network protocols (e.g. PHY, MAC, RLC, PDCP, RRC, NAS, etc.)
- Deep Knowledge of C/C++, CI/CD methodology is a plus
- Preferably the knowledge of architectural & application solutions based on Docker and Kubernetes
- Fluent in English, Italian and/or French is a plus

Preferred soft skills

- Organized with the ability to multi-task
- Problem-solver attitude
- Self-motivated with significant personal initiative
- Strongly organized skills with attention to detail
- A creative mind with a passion for new technologies
